

PDHI Partners with CoreMedica Laboratories, Inc to Offer At-Home Collection for Biometric Screenings

Extending testing methods supported by ConXus Biometrics to provide more options for wellness screenings and gaps in care closure programs.

BASKING RIDGE, N.J., September 26, 2022 – PDHI, a leading software provider supporting health plan, point of care, and corporate wellness health initiatives, has partnered with CoreMedica to offer at-home collection kits as an additional option for client biometric screening programs.

Scalable and flexible, ConXus Biometrics streamlines the management of screening options clients may offer to each population or group, including screenings completed on-site at health fairs, at home, at central labs, in the physician's office, or at a pharmacy.

“With more employees working remotely, our clients have requested this testing option to make it easier for employees to engage in screenings,” said Jennifer Jolley, CEO of PDHI.

“CoreMedica offers a proven test kit, state-of-the-art laboratory instrumentation, and powerful data integration that makes them an excellent partner for PDHI.”

CoreMedica’s mission, is to deliver innovation for better health, worldwide, by making blood testing simple and providing convenient access to quality lab-based testing through non-invasive fingerstick methods.

For clients, ConXus manages screening locations, services, scheduling, and the collection and reporting of results. The white-label participant center, which can be delivered as a standalone solution or integrated with the client member or benefits portal, allows participants to select the test type, location and appointment, or delivery address based on available options. Once results are processed, participants receive email or text notification and may log on to access results.

ConXus consolidates results from multiple vendors and venues, providing extensive reporting and data export options. For clients using the ConXus Health Assessment, screening results can automatically populate the assessment.

In addition to wellness screenings, ConXus Biometrics supports a range of laboratory and point of care tests and vaccinations, including COVID testing, flu shots, and COVID vaccinations.

About PDHI

PDHI is a software organization that develops and distributes the ConXus Platform to support population health management, point of care, and wellness programs. With a 25-year track record of success, PDHI is trusted by hundreds of companies including health plans, wellness providers, and large employers across the United States.

About CoreMedica Laboratories, Inc.

CoreMedica is a diagnostic services company with operations in the US. Founded in 2010 in Lee's Summit, Missouri, CoreMedica Labs spent its initial years developing the science, validating its methods, and implementing compliance to obtain College of American Pathologists (CAP) Accreditation and the Clinical Laboratory Improvement Amendments (CLIA) License. CoreMedica US is the first dried blood laboratory to receive CAP accreditation in 2014. CoreMedica is recognized by CAP yearly as: "a laboratory demonstrating continuous improvement in quality through participation in surveys, and pathology education programs" since 2011. The company provides a range of diagnostic services for corporate wellness, research, and pharmaceutical clients. For additional information visit coremedicalabs.com.
